**Program Description**

An initial assessment conducted by a licensed clinician that evaluates the need for Mental Health services and recommends treatment goals to guide future services as necessary. This service also includes a written report of the following: measures used, description of family/individual structure, individual/family history, current family/individual functioning and dynamics, perceptions of support, strengths/resources, needs and vulnerabilities.

A goal directed face-to-face psychotherapeutic intervention that is provided by a licensed clinician or may be an individual with a Master's Degree within the social services arena. Services are usually provided in an office setting and/or clinic. This intensive service aims at resolving deeper and more serious symptoms impacting behavior, thoughts, and emotions. Services are typically put in place to

prevent placement in a treatment center, psychiatric hospital, etc. The service may be utilized to address multiple crisis impacting the service recipient.
